

Music Learning Community Overview

Uplifting Education is a member of MusicLearningCommunity.com—a web-based playground of music learning games and activities that will enhance your child’s musical progress. Our membership gives all enrolled students unlimited access to this website from most devices that can connect to the Internet—any time, day or night. The site is filled with colorful, animated games with imaginative themes. Your child will enjoy exploring the site—and playing the games will reinforce music skills. This breakthrough website is designed by a leading expert in music and computer-based learning who was described by *The New York Times* as “a giant of multimedia music who began her work on education computer programs 18 years ago.”

Explore the website, and you’ll discover that this is a carefully constructed educational site intended to make learning music fun. The pedagogy is solid and is designed to fast-forward the music reading and listening skills your child is learning in our lessons.

If you are interested in using MusicLearningCommunity.com, [contact us](#) and we’ll set you up and send you your personal login. To get started, go to www.musiclearningcommunity.com. Type your user name and password and click “Log in.” Choose a level and then choose any game to play—click Learn, Play, Quiz or Challenge. The website should be accessible on any computer, any browser and most tablets and Android phones.

Find assignment sheets and other resources in your “Parent/Learning Coach Resources and Guides” course in Schoology. Students can receive credit for their time on MusicLearningCommunity.com. Credit can be based on hours spent (160 – 180 hours per credit) or on level completed. Using the assignment sheets available can help in planning and recording your activities. Your scores are kept in your score report in your student center on the MusicLearningCommunity.com website.

Enjoy.
