

eScience Labs

CompassLearning has partnered with eScience labs to offer hands-on lab kits to complement our online science curriculum. These kits are sold by eScience Labs. Each kit version contains a different set of labs. See Version Comparison Chart for more information on the web site, www.esciencelabs.com

Every kit purchase includes a digital manual and access to eScience Lab's online content designed to supplement the hands on experiments, provide pre-lab exercises and re-enforce important concepts. Registered users also have access to a monitored blog where they can compare results, pool data and communicate with other students. Volume and institutional discounts available.

Biology: Kit1108 (\$198.00, supports 1-5 students)

The Introductory Biology kit is designed to support introductory biology courses with a comprehensive series of hands-on experiments. This product is a 27-lab, two-semester series.

This kit is designed to complement CompassLearning Odyssey High School Biology.

Physical Science: Kit2247 (\$329.00, supports 1-5 students)

The Physical Science kit is designed to support introductory physical science courses with a comprehensive series of hands-on experiments. This product contains 21 labs covering two semesters of Physical Science.

This kit is designed to complement CompassLearning Odyssey High School Physical Science.

Physics: Kit2020 (\$198.00, supports 1-5 students)

The Introductory Physics Version 3 lab kit is a complete series of 29 lab exercises, designed for ease of use by both teachers and students at the high school or introductory college level. This series provides hands-on labs that relate to real world science, with an emphasis on acquainting students with natural phenomena in the language of physics. Concept development is emphasized over mathematical derivations. We use simple, but clever activities to focus on specific objectives in each lab, without requiring advanced math.

This kit is designed to complement CompassLearning Odyssey High School Physics.

Chemistry: Kit4003 (\$298.00, supports 1-5 students)

The Introductory Chemistry Kit includes carefully crafted experiments that bring safety to a new level by reducing or eliminating the use of hazardous chemicals. The accompanying manual guides students through innovative problem-solving pedagogy as students explore the critical concepts of chemistry using environmentally- and human-friendly materials.

This kit is designed to complement CompassLearning Odyssey High School Chemistry.

Ordering Process for CompassLearning clients:

Please contact eScienceLabs directly to discuss your needs.

- Purchase Orders (POs) are required 90 days prior to delivery date of kits.
- Standard terms and conditions as listed on our web site will apply, www.esciencelabs.com
- Shipping is \$19.95 per individual kit or \$15.95 per kit for bulk to schools
- A pre-payment discount will be offered to CompassLearning clients that would like to fully prepay their order with their 90-day PO.
- The **Custom kits** Physical Science and any variation to the Middle School Life Science Kit will require a 50% deposit with the 90 day PO and a minimum number of orders might apply.
